SIGNAGE LOCATION PLAN & MESSAGE SCHEDULE

Signage Location Plan Grid

The Signage Location Plan Grid is a programming tool that breaks up areas of Cañon City into sections to help identify signage locations. The following pages contain an individual grid section and identify sign locations within that area.

The highlighted areas indicate which quadrants of the sign location plan grid the signs will be located in.

Signs included on the following sign location plans are color coded to identify the intent of what type of sign is to be located in that position.

These documents are intended to illustrate design intent and should only be used as a general guideline. All locations shown are approximate. All final locations are to be determined during pre-installation site walk-thrus, prior to sign fabrication and must be approved by Owner. Detailing and information contained on these pages shall not be reproduced, copied, or utilized except for the specific project for which they were created, without previous written authorization from Tangram Design, LLC.
