

Ways to Prevent Deer Damage

Practical management strategies include selecting plants unattractive to deer, treating plants with deer repellents, netting and tubing, and fencing.

Plants

Flowers

Black-eyed Susan

California Fuchsia

Daffodils

Gaillardia/Blanketflower

Gayflower

Grape Hyacinth

Larkspur

Lavender

Mariposa Lily

Mountain Harebell

Pearly Everlasting

Purple Coneflower

Russian Sage

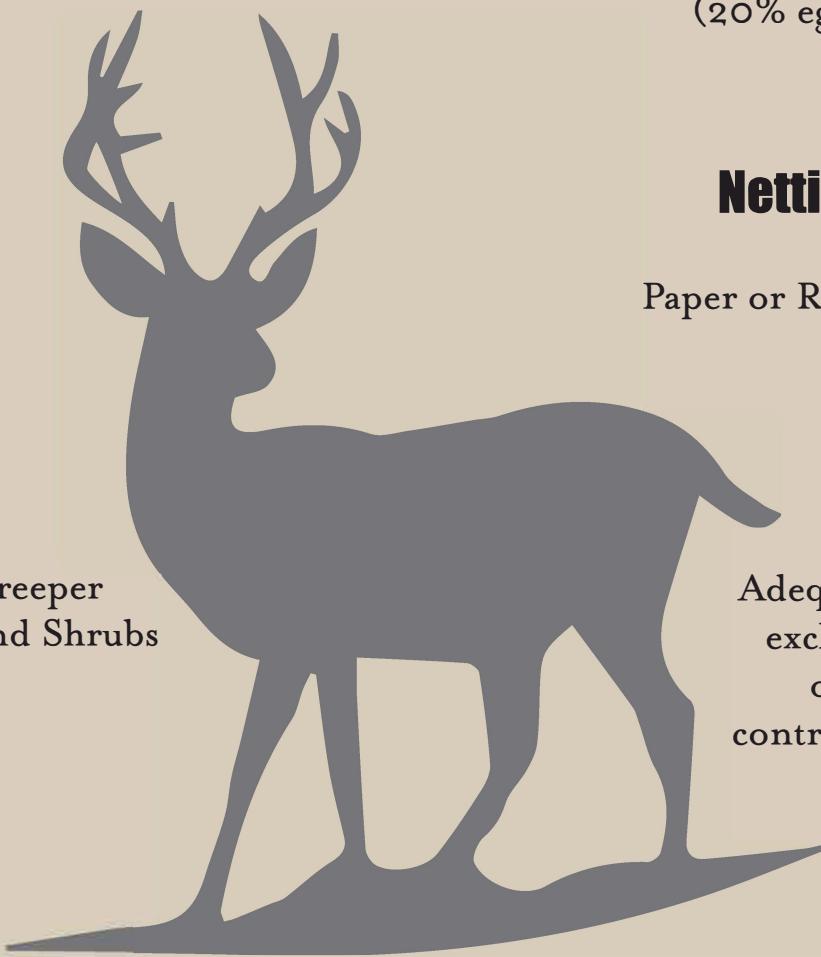

Thyme

Yarrow

Vines

Virginia Creeper

Trees and Shrubs

Effective Repellents

Hot Sauce - 6.2%

Deer Away

Big Game Repellent

Coyote Urine

Egg/Water Spray Solution
(20% eggs/80% water)

Netting & Tubing

Tubes of Vexar

Paper or Reemay Budcaps

Fencing

Adequate fencing to exclude deer is the only sure way to control deer damage

Two types of deer repellents

1. Contact repellents are applied directly to plants, causing them to taste bad.
2. Area repellents are placed in a problem area and repel by their foul odor.
